

FIGHTING CARDIOVASCULAR DISEASE CALL FOR EU ACTION

WHAT IS CARDIOVASCULAR DISEASE

Cardiovascular Disease (CVD)

is an umbrella name for conditions that affect the heart muscle or circulation (blood vessels). These include hypertension, stroke, heart failure, congenital cardiovascular disease, inherited heart conditions, and vascular dementia

H-E-A-R-T ACTIONS FOR THE EU

Healthy lifestyles through ambitious EU policy and regulation to reduce critical risk factors (smoking, obesity, sedentary lifestyles, etc.)

Equality in heart health by reducing the huge disparities in Cardiovascular Disease mortality that exist between and within EU Member States

Advancing knowledge by increasing EU funding for Cardiovascular Disease research

Registries for continuous quality improvement, registry-based clinical trials and safety surveillance of new treatments

Transfer of knowledge and best practice among Member States in prevention, diagnosis and management of Cardiovascular Disease

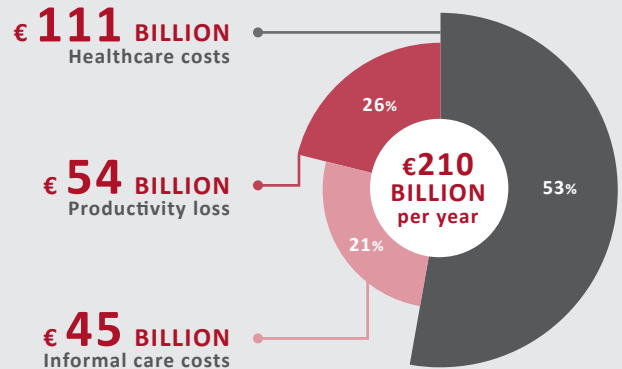

THE BURDEN OF CARDIOVASCULAR DISEASE (CVD) IN THE EU

IMPACT OF CARDIOVASCULAR DISEASE

LIVING WITH CVD (EU)

COSTS OF CVD (EU)

DYING FROM CARDIOVASCULAR DISEASE (EU)

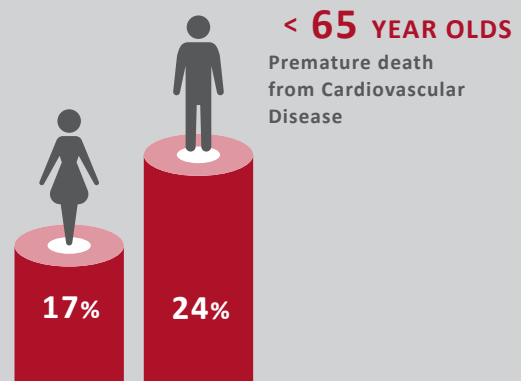

1.8 MILLION
Cardiovascular Disease deaths per year

=

5000
Cardiovascular Disease deaths per day

Cardiovascular Disease is the biggest killer in the EU and the world

DISPARITIES IN MORTALITY (EU)

A woman in Lithuania is **13x** more likely to die from heart disease than a woman in France

A man in Bulgaria is **8x** more likely to die from stroke than a man in France
